

## The projects to reduce environmental impact:

- The solar photovoltaic, with an installed capacity of about 67 kW and a peak energy produced annually by about 68.000kWh (estimated value), meets from 30 to 40% of total electricity needs and saves about 50 Tons of CO<sub>2</sub> environment each year.
- The insulation of office and warehouse properties has saved 33% of primary energy with the reduction of about 20 tons of CO<sub>2</sub> into the atmosphere each year..
- The 3R project which was implemented after careful analysis of the processes can allocate most of the waste reduction program, Recycling and Reuse in collaboration with the local authority municipalization.
- The ZeroCarta program (Digitization of internal documents) and the e-Workshop (production on-line tracking system) have greatly reduced the consumption of printing paper thus reducing forest depletion.
- The attention to maintenance, monitoring and control of equipment and facilities allowed to control air emissions and to reduce accidental damage to the environment.

## OVERCOME THE PRESSURE

### The FULGOSI QHSE commitment

The company Fulgosi S.r.l. has always been committed to deserve the trust of customers, employees, suppliers and the whole community, by focusing on quality first and then the environmental and occupational safety distinctive and concrete values. In particular, the Department has defined its strategic lines for Quality, Environment and Safety in this way

#### QUALITÀ >>> Quality

**Conformance:** The products must always be free from defects and shall satisfy contractual requirements to the first delivery. The same applies to services that should always be satisfactory to the first disbursement.

**Service:** Customers are entitled to get support and answers quickly and efficiently.

**Punctuality:** we can guarantee the delivery of reliable and predictable is absolutely one of the main expectations of our customers. Work to ensure that the provisions in the pre-contractual phase is reflected in the actual delivery of the service or product delivery is an overriding goal of Fulgosi Srl  
Fulgosi Srl Quality System is certified ISO 9001 since **2001**

#### SALUTE E SICUREZZA >>> Health and Safety

**Reduction and prevention of risks to health and safety** at work: we want to marshal all the actions possible and economically viable to reduce the risks to health and safety at work, such as assessment and information on the risks to workers (noise, vibration, optical radiation, stress related) and the use of protective devices, the continuous monitoring of compliance of the equipment used.

Certification for Health and Safety  
OHSAS 18001 in **2012**

#### AMBIENTE >>> Environment

**Reduction and prevention of pollution** we put in place all possible measures to prevent and economically sustainable and reduce environmental impacts of its manufacturing activities, such as the greenhouse effect (through the control of CO<sub>2</sub> and consumption of fossil fuels), the possible pollution of water (control of the oil disposal) and pollution from waste.

Environmental Certification  
ISO 14001 in **2010**

#### The grandmother's advices >>>

In order to involve non-certified companies that works with us in improving our environmental performance, even indirect, we have prepared a "First Steps" memorandum:

- Do you Know the main environmental impacts of your business?
- Are you sure you comply with all environmental and safety laws?
- How do you ensure that air and water discharges are under control?
- Do you manage the timing of approvals, analysis, etc.?
- Do you know the consequences of the dispersion of oil and waste in general?
- Have you assessed the risks to health and safety arising from your activities?
- Do you have a method to prevent accidents? Do you ensure the right protections?
- Have you ever thought what you could do to improve the environmental performance of your business?

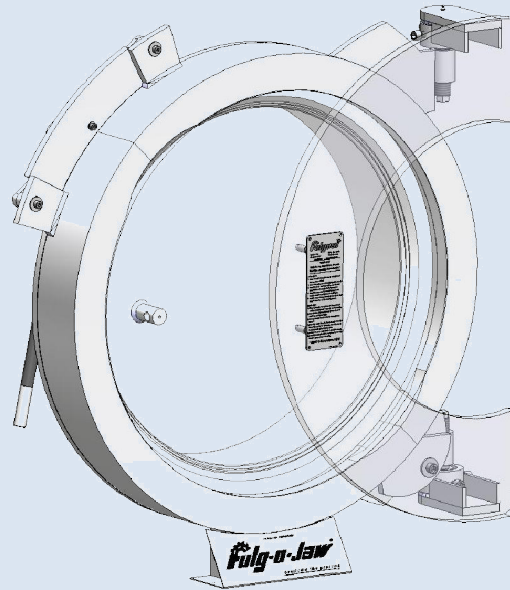

Quality  
System  
Certified  
ISO 9001  
ISO 14001

# Welcome to QHSE Project

QHSE is the abbreviation of Quality, Health, Safety and Environment and represents a renewed commitment in respect of Fulgosi workers and the environment.

Since 2001, in fact, Fulgosi's promotes projects for the protection of the trees and the atmosphere and more recently have been initiated programs dedicated to the safety of the works in general involving the internal staff, customers and suppliers.

Welcome to "QHSE Project", welcome the new era of Corporate Social Responsibility.
